SPEAKERS INVITED:

Dr. Navneet Kaur Popli- Senior Security Analyst, Calgary, Alberta, Canada

The webinar started with a very positive note because the participants were very excited about the topic and were enthusiastic to learn more about the relation between online games and their personalities. Dr. Navneet Kaur was equally enthusiastic to share her knowledge about the subject. She discussed about 16 basic personality traits and how these personalities play a specific type of game that not only matches but also enhances their personality. She also discussed that by knowing one's personality type, a student can choose a career, course or profession, in accordance to personality of the individual.

She discussed about personality types such as: ISTJ, INFJ, INTJ, ENFJ etc. and the types of story based, horror based and attack or competition-based games and avatars the players take up in these games reflect about their personality.

Participants were keen to raise queries and Dr. Navneet patiently and aptly answered all the queries raised by the students.

The webinar ended with a vote of thanks to the speaker and participants.
